

**DIGITAL
SIGNAGE
ANYWHERE**

*Innovating in
professional digital signage*

Corporate DIGITAL SIGNAGE

Deliver your message to any screen, anywhere.

Backed by 20 years of experience, our enterprise ecosystem utilises lightweight MQTT protocols and AWS infrastructure to turn mass-market Android and Windows devices into highly reliable, globally managed signage nodes.

THE DSA CMS

DSA Cloud Service

Hosted in the Amazon Cloud

- Access the DSA CMS from any browser, anywhere.
- Enterprise CMS scaling to any number of players.
- Easy to use with powerful features, in-line help, video tutorials, and a support portal.
- No infrastructure investment needed — fully hosted and maintained by DSA.

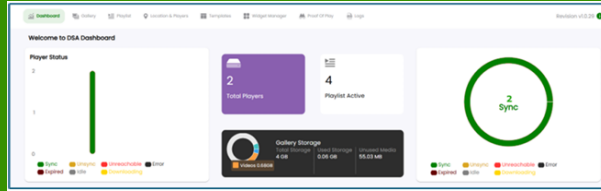

DSA On-Premise Server

Hosted on your own network

- Maintain complete data sovereignty and meet internal security requirements.
- Turn-key solution with Dell Server or commission on your own VPS or dedicated server.
- No reliance on external cloud services — ideal for regulated industries.
- Full control over updates, backups, and access policies.

DSA CMS Features

Integrated Content Tools

Upload pictures, videos, or HTML5 content with ease.

User Management

Granular user management and access control for enterprise teams.

Flexible Scheduling

Straightforward playlist and content scheduling across all devices.

Player Control

Monitor and remotely manage all players from a single dashboard.

Remote Upgrades

Push software updates to any device instantly over the air.

AT A GLANCE

Support Portal

DSA SIGNAGE PLAYERS

Windows Players

Turn idle workstations into branded communication channels. Share announcements, dashboards, safety messages, and campaigns using the built-in corporate screensaver feature.

★ Includes Corporate Screensaver Player

Android Players

Deploy at scale with low-cost Android devices. DSA runs reliably on a wide range of mass-market Android hardware, giving you flexibility and significant cost savings.

Flexible Deployment Options

DSA runs on both Windows and Android devices — use existing hardware or deploy fresh at scale.

Bring Your Data to Life with Power BI

Display live, interactive Power BI dashboards across your workplace. Keep teams aligned with real-time KPIs, operational metrics, and performance insights — right on the screens they see every day.

INTEGRATE WITH CONTENT CREATION PLATFORMS

Create digital signage content with ease and transfer it directly to DSA with our integrated content creation support.

 **Canva**

Design beautiful signage layouts with Canva's library and push directly to DSA.

 **Poster My Wall**

Update content seamlessly from Poster My Wall to the DSA Gallery and every linked playlist.

 **PowerPoint**

Leverage existing PowerPoint presentations — import slides directly into DSA playlists.

WHY CHOOSE

DSA Digital Signage?

Real-time data visualization

Live dashboards, KPIs, and operational data on every screen.

Easy content scheduling

Build playlists and schedule content across any number of devices.

Enterprise-grade security

AWS-backed or on-premise — you control your data.

Multi-platform playback

Windows, Android, kiosk — one CMS for all.

Scalable architecture

Manage hundreds or thousands of devices globally.

Advanced asset management

Full media gallery, user management, and remote control.
